AI Analytics	Rendering time • AI error rate • most selected styles • failed renders
Content Moderation	Review flagged images • remove harmful content • manage reports
Report Management	Support tickets • reply to reports • resolve issues • track status
Premium Management	Premium users • subscriptions • refunds • revenue analytics
Analytics Dashboard	User retention • feature usage • popular hairstyles • conversion rate
Trend Management	Trending hairstyles • celebrity promotions • seasonal trends
Notification Management	Broadcast alerts • personalized campaigns • promotional notifications
Storage & Security	Uploaded images • exports • session monitoring • security alerts
Admin Roles	Super Admin • Content Manager • Support Admin • AI Operations Admin
System Health	API status • database health • AI server health • GPU usage

ADMIN DATA

Users • Subscriptions • Analytics • Hairstyle Database • Reports • AI Metrics • Notifications

ACTIONS

Action	Result
Manage Users	Update user accounts
Add Hairstyle	Update hairstyle database
Review Reports	Resolve user issues
Monitor AI	Track AI performance

Send Notifications	Broadcast alerts
Manage Trends	Update trending feeds

VALIDATIONS

Validation	Response
Unauthorized access	Block access
Invalid admin session	Request re-login
Failed AI monitoring	Show retry/error state

PAGE 24 — AI SYSTEM ARCHITECTURE FLOW

PURPOSE

Explain the complete AI processing flow from image input to personalized hairstyle output.

FLOW

Upload Image → Face Detection → Hair Analysis → Recommendations → Virtual Try-On → Comparison → Export → AI Learning

MAIN SECTIONS

Section	Details
Image Input System	Upload selfie • capture photo • live camera feed • image validation
Face Detection System	Eyes • nose • jawline • forehead • face outline • head position
Face Shape Analysis	Oval • Round • Square • Diamond • Heart • Oblong

Hair Segmentation System	Hair region • beard region • hairline • hair boundaries
Hair Analysis Engine	Hair type • texture • density • thickness • shine • damage • frizz • gray hair
Beard Analysis System	Beard density • beard shape • beard length • mustache structure
AI Recommendation Engine	Hairstyles • beard styles • hair colors • celebrity matches
Hairstyle Matching Engine	Face compatibility • texture match • beard compatibility • trend suitability
Virtual Try-On Engine	Hair fitting • texture rendering • shadow rendering • edge blending
Live Camera Engine	Face tracking • head rotation • real-time hairstyle rendering
Comparison Engine	Before vs after • multi-hairstyle • color comparison • beard comparison
Export Engine	HD exports • comparison images • before/after exports
AI Learning Engine	Saved styles • user interactions • favorite categories • personalization learning
Notification AI Engine	Personalized alerts • trend suggestions • haircare recommendations
Storage & Security System	Uploaded selfies • saved styles • exports • encrypted protection • session security

AI SYSTEM DATA

Face Shape • Hair Type • Texture • Density • Beard Structure • Style Preferences • Saved History • Recommendation Scores

ACTIONS

Action	Result
Upload Image	Start AI pipeline
Analyze Face & Hair	Generate hair intelligence
Generate Recommendations	Suggest matching styles
Start Virtual Try-On	Render AI hairstyle

Compare Styles	Generate comparison layouts
Export Result	Download final output
Save Interactions	Improve personalization

VALIDATIONS

Validation	Response
Multiple faces detected	Reject image
Blurry image	Request better image
Poor lighting	Suggest better lighting
Invalid face angle	Request front-facing image
